

Does Eritrea have solar power?

Eritrea's weather, characterized by long sunny days throughout the year, makes it suitable for harnessing solar power. Data from the wind and solar monitoring stations installed in many parts of Eritrea show that the country has a great potential, around 6 kwh/m<sup>2</sup> of solar energy.

What are the benefits of solar energy in Eritrea?

The government of Eritrea has been making efforts to promote the use of alternative sources of energy, especially solar energy, to mitigate the problems associated with the use of fossil fuel. A major benefit of solar energy is that it does not pollute the environment and saves money in the long run even if its installation cost is quite high.

Which country has the largest solar power plant in the world?

The Noor Solar Complex in Morocco is a 500 MW solar park, which is the biggest concentrated solar power plant in the world. Eritrea's major source of energy is petroleum, which drains the foreign currency reserves of the country and is globally a major cause of pollution.

What is solar hybrid power in Areza & Maidma?

The two power plants, one in Areza (1.5 acres) and another in Maidma (2.5 acres), showcase the use of solar hybrid power systems to provide continuous power supply to rural communities in those areas.

In real-world conditions, a solar panel would only be exposed to one full peak hour of sunlight if it were around midday and there were no clouds in the sky. When this takes place solar panels function at 100-percent efficiency, meaning a 400-watt solar panel would produce 400 watt-hours of energy over the course of one peak sun hour.

Data from the wind and solar monitoring stations installed in many parts of Eritrea show that the country has a great potential, around 6 kwh/m<sup>2</sup> of solar energy. Based on studies carried out by the Ministry of Energy and Mines (MEM) meteorological sites for the detection of potential solar sites have been set.
