The contract for the installation was awarded in 2020 by Energodata, a major provider of ancillary grid services in Slovakia. Leclanché's 5.2 MW, 2.9 MWh containerised energy storage system was integrated into the plant's internal medium voltage grid.

The storage will consist of several smaller units (~32-64MW) located in Slovakia (central Europe). Considering energy density, charge and discharge efficiency, life span, and ecofriendliness of devices, the battery storage shall be based on Lithium-ion technology.

Wattstor and ENERGE are proud to announce their collaborative deployment of battery storage for ancillary services in Slovakia. Slovakia's grid just got a boost of stability and innovation thanks to Wattstor's pioneering 1.5 MW / 1.6 MWh battery energy storage system (BESS), the first of many projects planned for deployment in 2024.

The storage will consist of several smaller units (~32-64MW) located in Slovakia (central Europe). Considering energy density, charge and discharge efficiency, life span, and ecofriendliness of devices, the battery storage shall be based on ...

Battery Energy Storage System has been implemented at our production plant in Slovakia. This system serves to test functionalities and parameters while also offering services to optimize costs associated with the operation of the plant ...

As the photovoltaic (PV) industry continues to evolve, advancements in slovakia new energy storage have become critical to optimizing the utilization of renewable energy sources. From innovative battery technologies to intelligent energy management systems, these solutions are transforming the way we store and distribute solar-generated ...

Battery Energy Storage System has been implemented at our production plant in Slovakia. This system serves to test functionalities and parameters while also offering services to optimize costs associated with the operation of the plant and the utilization of a local photovoltaic installation

In a landmark achievement, Wattstor and ENERGE have successfully implemented a cutting-edge 1.5 MW / 1.6 MWh Battery Energy Storage System (BESS) for ancillary services in Slovakia, enhancing the country's grid stability and fostering innovation.

Wattstor and ENERGE are proud to announce their collaborative deployment of battery storage for ancillary services in Slovakia. Slovakia's grid just got a boost of stability and innovation thanks to Wattstor's pioneering 1.5 MW / 1.6 MWh ...

As Slovakia strides towards modernizing its energy infrastructure, Greenbat and Pixii have joined forces to pioneer the first battery storage system certified for primary frequency regulation (FCR) in the V4 countries. This collaboration marks a significant milestone in enhancing grid stability and integrating renewable energy sources in Slovakia.

With a high energy density and long cycle life, our 20kw Battery Storage system is designed to optimize energy usage and reduce electricity costs for residential, commercial, and industrial users. Our cutting-edge technology ensures high performance and safety, with advanced battery management systems to monitor and control the battery operation.
