

3 kw solar system price in karachi Lithuania

What is a 3KW Solar System?

In simple terms, it can be understood as a system that generates 12 units of electricity daily. A typical 3kW system often consists of six solar panels, each with a capacity of 575-585 watts, a 3kW solar inverter, and all other essential items required for installation. A 3kW system is capable of powering most small household appliances.

Should I buy a 3KW Solar System?

For such homes that consume less but pay more, a 3kW solar PV system is the best choice. If you consume between 300 and 400 units, a 3kW solar system is an ideal choice for you to eliminate high electricity bills for the next 25 years.

How many appliances can you run on a 3KW Solar System?

An average household who does not consume more than 12 units a day can run most of its appliances on the 3kW solar system. Here is the detail of all the appliances you can run on 3kW solar system. Where is the 3kW Solar System Most Suitable?
