How do I choose a solar inverter?

When designing a solar installation, and selecting the inverter, we must consider how much DC power will be produced by the solar array and how much AC power the inverter is able to output (its power rating).

How much space does a 60kW Solar System need?

A 60kW Solar System requires up to 4,300 square feet of space. 60kW or 60 kilowatts is 60,000 watts of DC direct current power. This could provide approximately 7,000 kilowatt hours (kWh) of alternating current (AC) power per month under ideal conditions, assuming at least 5 sun hours per day with the solar array facing South.

What is a Sol-Ark 60K outdoor rated enclosure?

Supports smart loads, parallel stacking, or AC coupling to existing PV systems. All-In-One means the Sol-Ark 60k outdoor-rated enclosure is a pre-wired system that contains the inverter, charge controller, auto-transfer switch, monitoring and connection unit all in one package; no fuses, breakers, or combiner boxes necessary.
