What are the basics of solar marketing?

However, before you start your journey down this road, it is important to know the basics of solar marketing: The first step in any solar marketing strategy is to define your target audience. Who are the people or businesses that are most likely to be interested in your solar products or services?

How can a solar marketing strategy help your business?

One of the best ways to achieve this is by putting together a solar marketing strategy for your company. Whether your business is brand new or you've been in the industry for years, implementing a solar marketing plan can be as small and cheap or more robust and involved as you like or have the budget for.

Should you segment your solar marketing campaigns?

Beyond these general solar marketing campaigns, you should also segment your customers. Segmenting ensures the right message reaches the right people. You can do this across counties, cities, even customer characteristics.

How to build a solar marketing plan for your business?

Here are all the ways you can start to build a solar marketing plan for your business. Regardless of how far you take your solar marketing strategy, the first thing you need to do is to outline who your audience and potential customers are and build some buyer personas to match. A buyer persona is a fictional representation of your ideal customer.
