São Tomé and Príncipe is verging on a breakthrough ocean thermal energy project that could pave the way for other nations. In April, the small island nation in the Gulf of Guinea granted UK-based firm Global OTEC approval for the island's first commercial-scale ocean thermal energy conversion (OTEC) platform.

São Tomé and Príncipe will have a new photovoltaic power station to produce more than 10MW of energy, in a 60.7 million dollar project co-financed by the World Bank, the African Development Bank and Japan. The project will last five years and will start in March.
