are ready-to-install energy solutions with everything ...

Our latest Whitepaper: Bridging the energy gap for Data Centres in Asia New Whitepaper-Bridging the energy gap for Data Centres in Asia Data Centre zones are sprouting up in close proximity to one another in many Asian countries, fuelled by investments from global cloud and co-location providers.

The global leader in energy solutions will be investing a significant proportion of this for growing it's European BESS fleet to enable more customers to decarbonise their power provision, add resilience, improve ...

With decades of experience providing market leading energy services to the mining sector across the world, we can share our technical mining expertise and advisory services when you're ready to expand, introduce renewables to your energy mix, or enhance your existing power plants with cleaner more efficient solutions. Furthermore, because we ...

"We have committed to investing hundreds of millions of pounds a year to support our energy transition commitments towards becoming a Net Zero business by 2050." The mining sector needs more flexible solutions, ...

AETS is not just innovating in renewable energy; we are pioneers at the forefront of Battery Energy Storage Systems (BESS), shaping the backbone of a more resilient power landscape. Partner with us and be part of a collective force driving the storage revolution, fortifying the grid, and unlocking the full potential of renewable sources.

aggreko is a leading provider of industrial energy solutions, with 180 locations worldwide. Find out about aggreko and what we do. ... At Aggreko we deliver energy solutions so businesses can grow and communities can thrive. Mines, data centres, sporting events, manufacturing sites - even whole cities - need electricity around the clock. ...

As well as the common challenges the mining industry faces, we will also share the best solutions to help you achieve sustainability and cost-effectiveness - simply by reducing your carbon emissions by up to 30% with Aggreko's hybrid solutions. These include: Hybrid power plants; Virtual gas power plants; Generators; Solar power; Wind farms

Hired Energy as a Service (EaaS) is a flexible model that enables your business to take control of its energy supply - with no upfront investment and long pay-back periods. Changing the way you look at energy supply and use. It has even created the opportunity for large industrial energy consumers to manage their own on-site generation.

The role of flaring in the energy trilemma How converting flare gas into clean energy can benefit both the environment and the bottom lines of oil and gas companies. Download the whitepaper to find out how

harnessing the power of flare-to-power solutions is critical for a sustainable energy future. Download our whitepaper

Aggreko Energy Transition Solutions (AETS) combines deep development expertise, industry relationships, and capital to help communities and companies decarbonize with reliable and clean turnkey energy solutions and infrastructure.

Every year, thousands of homes and businesses lose power supply for hours or days because of emergencies and natural disasters. Many utility power suppliers and distributors reactively call for support during these incidents, resulting in increased costs, delays to restoring power, and a reduction in cost-efficiency due to over-specification for the emergency response.
