Does Maui have a solar-energy microgrid?

Now, the island runs on a completely renewable microgrid that meets 100% of residents' energy needs through solar power and battery storage. In 2016, the founders of Maui, Hawaii-based company Mana Pacific helped design and implement Ta'u's solar-energy microgrid composed of over 5,300 solar panels.

How many solar panels does Ta'u have?

Located on seven acres of land on the northern coast of the island, the system includes 5,328 solar panels, generating 1.410 megawatts of electricity. The energy can be stored in 60 Tesla Powerpacks --large batteries that allow Ta'u to stay powered for up to three days without any sunlight.

How much power does a solar farm have?

This vast solar farm amounts to 1.4 megawatts of power generation capacity. Six megawatt-hours of battery storage and load balancing systems enable the microgrid to store excess energy for deployment when the sun isn't shining. As a result, the island can stay powered for three full days with no sunlight.
