

American Samoa solar system on credit in

Does American Samoa have a solar microgrid?

The island of Ta'u in American Samoa now boasts a solar microgrid from Tesla's SolarCity. Join us in The People v. Climate Change and share an environmental portrait of someone taking positive steps to protect the Earth on YourShot or social media. Use #MyClimateAction to share a first-person perspective on how we as humans face climate change.

How many people live in Samoa?

(The island's population varies with the season but usually falls between 200 and 600 people.) The solar project was installed by SolarCity, a California-based company recently purchased by Elon Musk's Tesla. The \$8 million project was funded by the U.S. Department of Interior and the American Samoa Power Authority (ASPA).

Does Ta'u have a solar-powered microgrid?

In November, Ta'u saw the completion of a new solar-powered microgrid, which shifted the entire island's energy generation from 100 percent diesel fuel to 100 percent solar. (The island's population varies with the season but usually falls between 200 and 600 people.)

How many solar panels does Ta'u have?

In 2016, the founders of Maui, Hawaii-based company Mana Pacific helped design and implement Ta'u's solar-energy microgrid composed of over 5,300 solar panels. This vast solar farm amounts to 1.4 megawatts of power generation capacity.

How much power does a solar farm have?

This vast solar farm amounts to 1.4 megawatts of power generation capacity. Six megawatt-hours of battery storage and load balancing systems enable the microgrid to store excess energy for deployment when the sun isn't shining. As a result, the island can stay powered for three full days with no sunlight.

What is a church choir in American Samoa?

Ta'u, American Samoa -- On a recent Wednesday evening on the island of Ta'u--one of the outer islands in American Samoa--most of the people in all three villages are at pese--or church choir--practice. The annual island-wide youth group showcases are coming up and each choir senses the pressure of having to perfect their routines.

Tesla has announced their solar panels are nearly entirely powering the island of Ta'u in American Samoa.. The island used to depend entirely on imported diesel fuel for its electricity, but a new initiative has seen the islanders build a 1.4-megawatt microgrid that absorbs and stores solar power for all their energy needs.

American Samoa solar system on credit in

On the heels of shareholder approval of their merger, Tesla and SolarCity are touting a microgrid on the island of T"au in American Samoa as the future of solar-plus-storage power generation.

On the heels of shareholder approval of their merger, Tesla and SolarCity are touting a microgrid on the island of T"au in American Samoa as the future of solar-plus-storage ...

The island of Ta"u in American Samoa, located more than 4,000 miles from the West Coast of the United States, now hosts a solar power and battery storage-enabled microgrid that can supply nearly 100 percent of the island's power needs from renewable energy.
