

The Spanish government offered Andorra's vacated grid point in a competitive tender in November 2021, which Endesa eventually won, securing rights to hook up to 1,200 MW. The company planned to use the capacity to connect a hybrid complex made up of five wind and five solar farms backed by a battery energy storage system, with an electrolyser ...

Endesa, through its renewable subsidiary Enel Green Power Spain, has been the provisional winner of the fair transition tender in Andorra, obtaining the right to connect 953 MW and the option to confirm up to 1,200 total MW.

The Solar Project, located directly on the Andorinha field where we are currently producing and about to commence drilling, demonstrates Petro-Victory's firm commitment to a sustainable and expandable ESG program that significantly decreases our carbon footprint as we increase and maximize shareholder value." About Petro-Victory Energy Corp.

Petro-Victory estimates that the Andorinha Solar Project will reduce Scope 2 emissions by approximately 60 tons of CO2 per year, lowering the carbon intensity of the Company's produced barrels of oil.

Endesa, a través de su filial de energías renovables Enel Green Power España (EGPE), ha comenzado la construcción de su primer proyecto solar situado en el perímetro de la central térmica de Andorra. Se trata de la planta fotovoltaica denominada Sedis V, que tendrá una potencia de 49,71 MWp y una inversión asociada de 37,6 millones de ...

Endesa SA (BME:ELE) has started the permitting process with the department of industry of the Spanish region of Aragon, seeking approval to build a 50-MW solar photovoltaic (PV) park on the land of the Andorra thermal power plant in Teruel province.

L'Oficina de l'Energia i del Canvi Climàtic i l'Andorra Recerca i Innovació han impulsat una nova eina digital, anomenada "potencial.solar", que permet fomentar la generació d'energia d'origen renovable.

The former energy production in a coal-fired thermal power plant will now be replaced by solar, wind, green hydrogen and storage projects, with a total installed capacity of more than 1,800 MW of new renewable capacity.

The project for Andorra entails an investment of more than EUR1.487 billion. Of the 1,725 MW of renewable energy, 1,585 MW will be generated at what will be the largest solar plant under construction in Europe, 139 MW will be from wind and the project will have a large-scale storage system of up to 159.3 MW.
