

Are batteries a problem for microgrid development?

Another challenge for microgrid development is the issue of energy storage. While battery storage is becoming more cost-effective and reliable, it still represents a significant upfront cost for many microgrid projects [31]. In addition, using batteries can create environmental concerns.

Should microgrids be implemented?

Another important consideration for the implementation of microgrids is the issue of social equity. Access to reliable and affordable energy is critical in many communities. Microgrids can solve this problem by providing a more localized and community-based approach to energy access.

Are microgrids addressing global sustainability issues?

Ultimately, this research article contributes to the growing knowledge of microgrids and their role in addressing global sustainability issues. It offers practical recommendations for policymakers, industry stakeholders, and local communities in Pakistan and beyond.

## 1. Introduction

Who should be involved in microgrid development?

As the use of microgrids becomes more widespread, there is a growing need for collaboration and information-sharing between stakeholders. The stakeholders are utilities, regulators, researchers, and local communities. These stakeholders can help develop common standards and best practices for microgrid development [33].

Are microgrids a potential for a modernized electric infrastructure?

1. Introduction Electricity distribution networks globally are undergoing a transformation, driven by the emergence of new distributed energy resources (DERs), including microgrids (MGs). The MG is a promising potential for a modernized electric infrastructure, ..

How can microgrids support sustainable agriculture and forestry practices?

In addition, microgrids can support the development of sustainable agriculture and forestry practices by providing clean, reliable energy for irrigation, processing, and other activities.

## 5.6. Limitations in Pakistan

### 5.6.1. Cost

One major limitation of microgrids is their cost.
