The Green Barbuda project is a hybrid solar, batteries and back-up diesel project, featuring a hybrid PV plant with 720 kWp of solar panels connected to a 863 kWh battery. It is capable of fully meeting the island's current daytime energy demand.

The project will implement California based Electriq Power's PowerPod 2 storage in the ten homes, along with a virtual power plant management system. The batteries will be operated as a VPP to provide both backups during power outages as well as grid services to support CUC's distribution infrastructure.
