

How do solar panels work?

When sunlight hits the silicon in solar panels, the electrons get excited, generating an electric current that goes to a solar inverter and is then used to power appliances and devices. If your solar panels produce more energy than your home needs, the extra solar energy can be sent to the utility grid or stored in an energy storage system.

Why should you use solar energy to power your home?

Generating energy from the sun is free--using it to power your home can help protect you from rising energy costs. Generate,use,store and charge--all with one fully integrated clean energy ecosystem by Tesla. All of our products work together seamlessly,optimizing your energy usage and savings while minimizing your impact on the environment.

Why should you choose a home solar installation service?

Home solar technology offers electricity bill savings, more energy independence, and resilience in the face of an increasing rate of power outages. For the environmentally conscious, it provides an eco-friendly alternative to existing electricity sources. But shopping or even researching home solar installation services can often feel daunting.

Is solar power a good option for your home?

Solar power can be an attractive prospect for homeowners and shoppers. Home solar technology offers electricity bill savings, more energy independence, and resilience in the face of an increasing rate of power outages. For the environmentally conscious, it provides an eco-friendly alternative to existing electricity sources.

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home,assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity,the solar resource across the United States is ample for home solar electric systems.

What is a solar billing plan?

When you need more energy than your system can generate, like at night or on cloudy days, you will use energy from SCE's grid. The difference between the energy you consume from the grid and the energy your system delivers back is then used to calculate your monthly bill. This is known as the Solar Billing Plan.

Solar applications are typically managed by the solar installer through Xcel Energy's Distributed Energy Resource (DER) Application Portal. It's important to Xcel Energy that your personal ...

Most solar panel installations throughout the U.S. are connected to the grid. With grid-tied systems, you can

draw power from the power grid when your solar panel system isn't producing electricity. Additionally, you can ...
