

Do you need insurance for solar panels?

When it comes to adding solar panels -- otherwise known as photovoltaic (PV) systems -- to your roof, most insurance companies see them as part of the structure of your home. That's good news because it means a regular homeowners policy usually has you covered, and you won't need to get special insurance just for your solar panels.

Do solar panels affect home insurance?

As with any alteration to your home, solar panels can and will change the cost of home insurance. The total cost of your homeowner's insurance is based on the value of your property. This value includes the structure of the house as well as the belongings kept inside.

Does home insurance cover rooftop solar panels?

Yes, most home insurance policies do cover rooftop solar panels. By installing solar panels you are enabling your house to produce its own electricity. These rooftop solar panels are usually considered a permanent attachment to your property, similar to a patio or a security system and can, therefore, be considered a form of home improvement.

Are solar panels covered by a separate insurance policy?

Separate insurance policies for solar panels may offer additional benefits, such as coverage for loss of income due to system downtime or the costs associated with temporary replacement power. These added protections could provide financial security in unexpected disruptions to your solar panel system.

What is a dedicated solar panel insurance policy?

A dedicated solar panel insurance policy is designed to provide comprehensive coverage for your solar panel system. It often offers more extensive protection than what is provided by homeowners insurance.

How much does solar panel insurance cost?
