

What is moxion power?

While big legacy companies like Generac and Caterpillar are beginning to offer small battery-powered units in addition to their larger diesel generator lines, California-based startup Moxion Power is focused entirely on this new power frontier. It is building high-powered, mobile energy storage technology that can be used pretty much anywhere.

How much money does moxion power have?

Total funding so far: \$110 million. California-based startup Moxion Power is building high-powered, mobile energy storage technology that can be used pretty much anywhere.

What is Amazon doing with moxion?

Amazon is both investing in the company and currently leasing Moxion units for two video productions, a movie and a series. The generators will power cameras, base camps, lighting, hair and makeup trailers, and other production equipment.

Who makes moxion battery modules?

"We design, engineer and manufacture all of the core technologies that we use. So we're not buying someone else's battery module. We are actually manufacturing battery modules in house," said Paul Huelskamp, CEO of Moxion. Huelskamp says diesel generators are notoriously difficult and expensive to maintain and burn diesel fuel very inefficiently.

How does moxion work?

Under Moxion's model, clients can either buy the units or rent them. For rentals, Moxion uses technology that alerts them when the batteries are running out, so they can replace them with no lapse. They claim to know exactly what the state of charge is.

Are moxion generators Dirty?

But they are dirty, emitting carbon dioxide as any other fuel-burning engine does. While big legacy companies like Generac and Caterpillar are beginning to offer small battery-powered units in addition to their larger diesel generator lines, California-based startup Moxion Power is focused entirely on this new power frontier.
