

How much do solar panels cost in Australia?

Or to put it another way - how many kilowatts (kW) of solar panels you choose to install will affect how much it costs. Prices in Australia have dropped significantly since I started SolarQuotes over a decade ago (when a piddly installation with 1 kW of solar panels cost \$10,000!) - particularly pricing for larger systems.

Are solar panels a good investment in Australia?

Solar panel installation in Australia is a smart investment, offering significant long-term savings and environmental benefits. While the upfront cost may vary depending on several factors, government incentives and careful planning can make solar power accessible to most homeowners.

How much does a 5kw Solar System cost in Australia?

The cost of a 5kW solar power system varies across Australia, with an average cost of around \$5,250 after rebates or \$6,500 without. However, the cost of a solar PV system can be as high as \$11,000 in Darwin, while it can be under \$6,000 in Adelaide and around \$5,000 in Sydney and Perth. What affects solar panel installation cost?

Are cheap solar panels a good investment?

Cheap solar panels may not capture as much sunlight or tolerate shade as well when compared to more sophisticated options. However, the smaller upfront cost teamed with a lower efficiency panel may still deliver you an excellent return on investment.

How long does a solar system last in Australia?

Installing a solar power system can definitely pay for itself over time. According to the Clean Energy Council, rooftop solar systems can pay for themselves in as little as three and a half years in some parts of Australia, depending on the size of the system and the household's electricity consumption. How much money does solar save you?

Will solar panel costs continue to decline?

Many people in the solar industry expect solar panel costs to continue to decline, albeit at a much slower pace. Manufacturers continue to progressively release improvements in cell efficiency and panel designs which are now edging leading Solar Panels towards 1,000W of power.

Average Costs of Solar Panel Installation in Australia. Understanding the average cost of solar panel installations in 2024 helps you budget effectively. For a typical 6.6kW system, homeowners can expect to pay between \$4,000 and \$8,000 after applying STC discounts. This price range includes both the cost of panels and installation.

The below table shows the average solar panel cost by city & size of solar panels installed (DC). The prices in

all the below tables include the up-front incentive available for small-scale systems through the Renewable Energy Target (i.e. "STC discount") and GST - they represent the total retail price of the system to the customer .

How much does it cost to install solar panels in Australia? The cost of a 5kW solar power system varies across Australia, with an average cost of around \$5,250 after rebates or \$6,500 without. However, the cost of a solar PV system can be as high as \$11,000 in Darwin, while it can be under \$6,000 in Adelaide and around \$5,000 in Sydney and Perth.
