Are "free" solar panels a good idea?

The concept of "free" or "no-cost" solar panels really is too good to be true. "Free" solar panels are essentially rented from solar companies. While you will reap the benefits of cheaper electricity bills through solar power, you do not own the panels; the solar company does. Once your lease agreement is up, the panels will be removed.

Does the government offer free solar panels?

While the government isn't offering free solar panels, it offers a tax credit that can be claimed on federal income taxes for those who use solar power on residential property. The credit was increased and extended through 2034 by the Inflation Reduction Act.

Can you get a tax credit if you buy solar panels?

"The federal government does not have any programs that install solar panels on the homes of Americans for free," Jones-Albertus wrote. "A 30% tax credit is available to those who purchase a solar energy system."

Do you own solar panels with a "no cost solar" agreement?

You will not own the solar panels with one of these "no cost solar" agreements. In other words, solar leases are essentially like renting solar panels. The solar company handles all of the installation and maintenance for a specified term, which is usually around 20 to 25 years.

Do low-income solar programs offer free solar panels?

Low-income solar programs don't typically provide completely free solar panels, but they can greatly reduce installation costs. Most of the programs provide rebates or grants to cover the majority of rooftop solar installation costs for qualified applicants, but there may still be some costs or payments required.
