

What is EnSync Energy Systems?

EnSync Energy Systems is a company specializing in creating the future of electricity with innovative distributed energy resource (DER) systems and internet of energy (IOE) control platforms.

Does Azerbaijan have electricity metering?

All electricity and natural gas consumption is metered in Azerbaijan. Metering systems comply fully with international standards, and distribution entities own all end-user meters. Electricity and natural gas tariffs for households and most commercial entities are differentiated.

What is Azerbaijan's potential for small hydropower?

Although hydropower is Azerbaijan's largest source of renewable energy today, its potential has not been fully exploited. According to the Ministry of Energy, the country's technical potential for small hydro is 520 MW, which could generate up to 3.2 TWh annually.

What is Azerbaijan's energy regulatory agency?

In 2017, the President of Azerbaijan signed a decree establishing the Energy Regulatory Agency under the Ministry of Energy to regulate relationships among producers, suppliers and transmission system operators and distributors, as well as customers in the field of electricity, heat and gas supply.

How can Azerbaijan improve energy security?

Diversifying and improving the energy capacity of the country to ensure energy security. Azerbaijan has significant untapped renewable energy potential, as it is a relatively sunny and windy country, and it also has sizeable hydro, biomass and geothermal resources.

How can Azerbaijan generate electricity from biomass?

Rapid growth in industry, agriculture and social services in Azerbaijan is creating new opportunities for electricity generation from biomass derived from combustible industrial waste, forestry and food processing waste, agricultural waste, and other biological substances. The Ministry of Energy estimates technical potential of 380 MW.

EnSync, Inc, dba EnSync Energy Systems, a leading developer of innovative distributed energy resources (DERs), and DCfusion, a pioneer in direct current (DC) system engineering design, consulting and policy, have designed and will manage the Smart Energy Microgrid Marketplace on-site microgrid demonstration system.

ZBB Energy Corporation (NYSE MKT: ZBB) is a leading developer of innovative energy management system solutions serving the utility and commercial and industrial building markets, providing reliable power in off-grid and grid-connected environments throughout the world.

EnSynchrony(TM) is a leader in electricity storage services, and the delivery of green electricity. Our innovative EnSync storage system enables our clients to successfully transition to the electric grid of the future and empowers them to operate more efficiently and cost-effectively.

Because securing energy independence in the long term is central to Azerbaijan's energy policy, it has recognised the value of diversifying its economy, increasing energy efficiency and ...
