

How many solar PV projects are being built in Azerbaijan?

UAE state-owned renewable energy developer Masdar has started constructing two solar PV projects in Azerbaijan, with a combined capacity of 760MW. The entire development, developed in collaboration with Azerbaijan's state oil company SOCAR, includes the 445MW Bilasuvar solar PV project, the 315MW Neftchala solar PV project and a 240MW wind project.

How much electricity will Azerbaijan generate a year?

PV Tech reported that these projects are the first phase of a 10GW pipeline of renewables projects in Azerbaijan signed in 2022. Parviz Shahbazov, Azerbaijan's energy minister, said the projects could generate 2.3 billion kWh of electricity annually.

Is Azerbaijan a 'key strategic market' for Masdar?

It is Azerbaijan's first foreign investment-based independent solar project and currently the largest PV plant in the Caspian region. Masdar Chief Executive Officer Mohamed Jameel Al Ramahi said Azerbaijan is a "key strategic market" for the company. Azerbaijan has set a target of generating 30% of its energy capacity from renewables by 2030.

The project marks AIIB's first private-sector renewable energy initiative in Azerbaijan, aligning with AIIB's Green Infrastructure thematic priority and supporting the Bank's Corporate and Energy Sector strategies. The solar PV plant is expected to deliver clean, affordable electricity, avoid greenhouse gas emissions by approximately ...

Azerbaijan has achieved a groundbreaking milestone in its energy landscape with the official launch of the 308MWp Area 60 solar power project. This utility-scale photovoltaic (PV) power plant, the country's first and largest, marks a significant stride towards sustainable energy generation and diversification away from

traditional oil and gas ...

The Project involves financing the development, construction, operation, and maintenance of two solar photovoltaic (PV) power plants in Azerbaijan - (i) 315 MWac Banka solar PV power plant (Banka Solar); and (ii) 445 MWac ...
