Backup for home Slovakia

What is the difference between local and online backup services?

At PCMag, we used to differentiate between local backup software and online backup services. The difference is one makes a copy of your data that you store wherever you choose, such as on an external hard drive, and the other securely sends your data to the backup company's servers for off-site storage.

How does a backup company work?

A few backup companies offer bulk upload and restore services,sometimes also called courier services. When you need to restore your data,the company sends you an external drivewith your data on it so you can plug it into your machine and get your files back fast.

What options are available for a backup plan?

Flexible backup configuration: For advanced users, multiple options to schedule and optimize backups are available. You can configure multiple personal backup plans, create various schedules, use incremental or differential backups, limit the number and age of backup copies, exclude certain files and folders, and much more.

Back up your device to an external drive. In Windows, you can back up and restore files using Backup and Restore or File History. By default, File History is turned off in Windows. Back up folders using File History, go to Start > File History (Windows 11) or Backup settings (Windows 10) > Add a drive > More options.
