

What is the energy efficiency initiative in the Bahamas?

With energy-related costs estimated at 15% to 20% of annual operating budgets for small- and medium-sized hotels in the Bahamas, the Bahamian hotel industry launched a significant energy efficiency initiative in 2013 in partnership with the Government of the Bahamas to reduce energy-related costs.

What type of energy is used in the Bahamas?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Bahamas: How much of the country's energy comes from nuclear power?

How will a new energy system affect the Bahamas?

Comprehensive upgrades to our country's transmission and distribution infrastructure, and switching from heavy and diesel fuels to solar power and natural gas, will create new efficiencies and reduce the price of electricity in The Bahamas. But it won't happen overnight - it will take time to upgrade our grid and to integrate cleaner energy.

How much does electricity cost in the Bahamas?

Located north of Cuba, with the Turks and Caicos Islands to the southeast, the Bahamas has an average electricity cost of \$0.32 per kilowatt-hour (kWh), in line with the Caribbean regional average of \$0.33/kWh.

What is the new energy era in the Bahamas?

It's a New Energy Era in The Bahamas. Our electricity sector requires comprehensive reform. Lowering prices, and ensuring fair prices, for Bahamian homes and businesses. Increasing the reliability of our electricity supply. Increasing hurricane resilience during this new climate era.

How much power does the Bahamas have?

The Bahamas Electricity Corporation (BEC) controls 438 megawatts (MW) of generation capacity, while Grand Bahama Power Corporation (GBPC) controls the remaining 98 MW. Generation is currently fueled by all imported petroleum with a mix of diesel (56.5%) and heavy fuel oil (43.5%), totaling 1,930 gigawatt-hours (GWh) for the entire country.

As The Bahamas charts a path toward a cleaner, more resilient energy future, each island plays a pivotal role in the transformation. This segment explores the exciting new projects on key islands, showcasing how cutting-edge technology will ...

Bahamas: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen

country across ...

Welcome to the official website of Hon. JoBeth Coleby-Davis, Minister of Energy and Transport for the Bahamas. As a dedicated leader, Minister Coleby-Davis is committed to advancing sustainable energy policies and modernizing transportation infrastructure across the Bahamas.

Bahamas: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

With energy-related costs estimated at 15% to 20% of annual operating budgets for small- and medium-sized hotels in the Bahamas, the Bahamian hotel industry launched a significant energy efficiency initiative in 2013 in partnership with the Government of the Bahamas to reduce energy-related costs. The initiative aims to conduct energy audits

"In The Bahamas, we can harness the sun's abundant energy, reduce our reliance on imported fuels, and take charge of our energy future. Powering more of our energy needs with the sun aligns with our values, our economic needs, and our environmental responsibilities."

The Ministry of Energy & Transport Bahamas is dedicated to bringing about energy and transportation reform in The Bahamas, transforming outdated and dysfunctional energy generation, distribution, and transmission, while ensuring a safe, efficient, and sustainable transport network across the Islands.
