

What is a balcony solar power plant?

Balcony solar power plant is a miniature photovoltaic module to generate electricity for your home. Equipped with an AC plug and an integrated inverter. Just plug it into your outlet and it will generate its own electricity and connect to your home's power grid.

What is a balcony power storage system?

Balcony Power Storage System increases solar power efficiency and reduces electricity consumption from the grid. Nearly all of that solar power generated during the day goes to your home or is stored for later use. And with a plug-and-play setup and a wide range of functions, you can relax while powering your home with sustainable energy.

Can a balcony be used as a power plant?

Use balcony brackets to turn your balcony into a green energy power plant (for 410W and 445W PV panels only). Customize your energy based on your home's needs and area's sunlight conditions. Even when you're on vacation you can manage your energy storage. Let us deliver Balcony Power Storage System, even if you live in an upstairs apartment.
