

What is the Barbados national energy policy (BNEP)?

This Barbados National Energy Policy (BNEP) document is designed to achieve the 100% renewable energy and carbon neutral island- state transformational goals by 2030. These include: Provision of reliable, safe, affordable, sustainable, modern and climate friendly energy services to all residents and visitors.

Does Barbados need a BNEP?

The BNEP provides a basis for building on these successes while seeking to expand the use of these and other renewable energy technologies such as wind and biofuels. However, even as Barbados promotes the development of renewable energy, there are ongoing plans to explore for fossil fuel resources offshore.

Why should Barbados invest in the energy sector?

The energy sector in Barbados should be invested in to foster development, promote energy security, reliability, affordability, and establish and maintain a sustainable sector. This can be achieved through innovation and workable partnerships which promote a strong economy and a healthy environment.

Should Barbados invest in fossil fuels offshore?

However, even as Barbados promotes the development of renewable energy, there are ongoing plans to explore for fossil fuel resources offshore. This patrimony will be pursued aggressively with the view to maximise foreign exchange gains from the export of any exploited hydrocarbons.

Pavana Energy is committed to building renewable energy projects that are climate resilient. Our turbines are designed to be lowered and secured in the event of a hurricane. All our solar farms are designed with a focus on key structural elements of the installation being able to withstand hurricane wind speeds.
