

At the forefront of the renewable energy sector in Malta, Solar Solutions was set up in 2005 by individuals with a passion for sustainability. Our unwavering commitment has enabled numerous households and businesses to adopt solar power, creating a positive environmental impact through harnessing the sun's energy.

Virtue Solaris is your one-stop provider for well-priced solar panels Malta, battery storage, off-grid solutions, solar carports and more! You can find us at: Sagra Famiglia Building, Triq Maestro George Zarb, Handaq (Qormi)

The average payback period or return on investment (ROI) for most battery systems in Malta is around 3 - 5 years. Households with higher energy consumption tend to recoup their investment in solar battery much faster due to avoidance of higher import tariff bands.

A battery storage system is able to store unutilized energy generated from your solar panel system. In this way, the energy generated during the day is never lost and can be stored in the battery and utilized at night when consumption might ...

A battery storage system is able to store unutilized energy generated from your solar panel system. In this way, the energy generated during the day is never lost and can be stored in the battery and utilized at night when consumption might be higher. Our Battery Storage Systems offer state of the art monitoring.

Is solar battery worth the investment? The average payback period or return on investment (ROI) for most battery systems in Malta is around 3 - 5 years. Households with higher energy consumption tend to recoup their investment in solar battery much faster due to avoidance of higher import tariff bands.

A solar panel battery not only provides you with energy that is solely provided from the sun, which in itself will decrease your energy cost, but it will also provide you with extra hours of light when there is a power outage.

When installed alongside a battery system, the extra units generated are stored for use during periods of low generation, such as at night. This allows the homeowner to maximise the use of the solar energy ...

At Renewable Living, we provide advanced solar battery systems that not only store the energy generated by your solar panels during the day but also ensure that your home or business stays powered even when the sun goes down. Our battery systems deliver both energy storage and backup solutions, offering maximum efficiency and energy independence.

A solar panel battery not only provides you with energy that is solely provided from the sun, which in itself will decrease your energy cost, but it will also provide you with extra hours of light ...

In Malta the grid belongs to Enemalta Corporation. With an on-grid system, there is an option to add an energy storage system (known as a battery system). The electricity generated by the PV system will either be consumed by the household or sold to the grid.

When installed alongside a battery system, the extra units generated are stored for use during periods of low generation, such as at night. This allows the homeowner to maximise the use of the solar energy generated, reducing the units of electricity purchased from the grid and thus lowering electricity bills.
