

The Solar Slate Plate for slate roofs has been tested at Bre to MCS012 standards for wind uplift and weather-tightness where it achieved a design wind uplift resistance of 1.48 kN for each individual Solar Slate Plate, and our ERIC-TILE for plain/rosemary type roofs achieved a design wind uplift resistance of 0.698 kN with our "L" roof hook ...

The Solar Slate Plate system is intended for use with either 600mm x 300mm or 500mm x 250mm natural or man-made slates. For these tests the Solar Slate Plate was installed with 500mm x 250mm natural slates with 100mm headlap. This size Solar Slate Plates were chosen for the test as they are the smallest

Only 3 slates need to be removed for each Solar Slate Plate. The Solar Slate Plate has been designed to speed up installation times, allowing the installer to complete a 4KW install much quicker than having to cut the slates and make weatherproof with lead. It is possible to complete a 4KW system within 4hrs.

Solar Slate Plate Ltd guarantees its components [all steel, aluminium, plastic and stainless steel parts), that under normal application, installation, operation and maintenance conditions they are free from material and manufacturing failures for a period of ten [10) years. In the case that the quality of a component does not

The service provided from Solar Slate Plate was exemplary from start to finish. The products were delivered when promised with very little time between order placement and delivery. The project we were working on was Stamshaw School for Portsmouth City council and was built around 1860 with clay tiles. We have used many solar Pv roof fixings in ...
