The U.S. Government is supporting Benin's electric power sector through a \$391 million MCC compact that will close in June 2023. The compact has supported power sector policy reforms to ensure tariffs reflect costs, attract private capital into renewable power generation, and strengthen regulation and utility management.

The SBPE will be a public capital company responsible for the production and sale of electricity through the exploitation of its own assets, purchase of solar energy produced by private operators and the sale of electricity to SBEE and the development of renewable energies.

In the 2011 ÖAMTC battery test, the Banner Power Bull P72 09 battery was given a "Good" and thus the top rating that the organisation awards in such assessments. The power pack from the starter battery specialist Banner convinced the Austrian automobile club right down the line in what represents the toughest of independent battery tests.

Banner is an emerging player in the power sector, with experience in captive power generation projects completed with MTN Communications, Homegate Nigeria Ltd, etc; with current maturing opportunities in the 30MW embedded power generation with
