

Our solutions seek to reduce emissions, optimise energy consumption and the use of industrial by-products such as sunflower husk, wheat bran, rice husk, forest biomass and sludge, among others. Berkes also has an extensive experience carrying out Heat and Power Plant concepts (CHP), making it possible to generate electrical power and delivering ...

In 2021, Berkes acquires Burmeister & Wain Energy (BWE), a company with almost 180 years of history and solid experience in the design and manufacturing of steam boilers. This acquisition has represented a turning point for Berkes, enabling the company to enter new markets and expand its footprint across Europe and other strategic regions.

Berkes creates tailor-made energy solutions using our engineering know-how in all possible applications. Focused on clean burning systems for biomass and waste, combining the knowledge and expertise of our professionals to provide the most reliable and suitable solution for each particular application.

The document provides information about Berkes, an international engineering company with 1100 employees across multiple divisions and offices. It has three main divisions: Energy, Construction, and Industry. The Energy Division focuses on design, manufacturing, and services related to steam boilers, thermal power plants, and engineering services.

The Energy department builds, installs and maintains industrial boilers, using its own technology for the combustion of biomass and industrial waste. Steam boiler, energy generator boiler, operation and maintenance of thermal plants and turnkey projects.

With more than 80 years developing projects on the international energy arena, Berkes has become a unique player globally in the field of construction and engineering. With experienced teams with specialized knowledge, capable of analysing each project, Berkes has positioned itself as one of the leading companies in the industry, providing fast ...

6 ???&#0183; Serbia's energy sector is undergoing significant changes, with a strong focus on modernization, expansion, and sustainability. The AERS 2023 report outlines key developments in Serbia's energy sector, highlighting ongoing projects aimed at increasing energy capacity, reducing carbon emissions, and enhancing energy security.

The Berkes ENERGY area is characterized by the design, manufacture, supply and assembly of industrial and power boilers, in a wide range of aspects, being able to offer world-class technology for a large number of biomass fuels and waste.
