

What is a durapower battery system?

Durapower battery systems can be designed for opportunistic fast-charging and can be charged within minutes. Durapower battery cells are lightweight and compact, resulting in more energy-efficient EV fleet operations, and better space utilisation in today's land-scarce environment for other stationary ESS applications.

What makes durapower a successful business model?

Durapower believes that to be successful, the market needs to be sustainable and so is our business model. Market sustainability is a result of not only government policies, but also measured in terms of social and environmental impact. Renewable energy (RE) and transport electrification is a global directive, of which energy storage is essential.

Who does durapower serve?

The company caters to blue chip companies, system integrators, original vehicle equipment manufacturers, fleet operators, independent power producers, and grid operators. Durapower has 5 employees across 3 locations. See insights on Durapower including office locations, competitors, revenue, financials, executives, subsidiaries and more at Craft.

Are durapower batteries repurposed?

Durapower batteries have been in the commercial market since 2011 and part of the retired lithium-ion batteries that we have supplied to electric vehicle fleets around the world have been deployed for repurposed applications or recycled at end of life. Give your perspective on sustainability and carbon neutrality in EV industry?

Durapower offers modular and scalable energy storage systems for various applications, including peak shaving, emergency response, black start, and frequency regulation. E-Mobility Solutions: Durapower provides lithium-ion battery solutions for electric vehicles, including buses, passenger cars, light vehicles, and last-mile delivery vehicles.
