BE Solar is Bermuda's most established solar and energy efficiency company. The company provides the most compelling investment opportunities for increasing the value of your home by implementing energy savings and ...

The most commonly used types of solar modules are the Polycrystalline silicon and Monocrystalline silicon. The cost of installing a kilowatt in Bermuda is around \$4,000 to \$6,000. A good solar photovoltaic panel can last between 25 to 40 years. However, the inverter may need to be replaced after 5 to 10 years.

Once you know the optimum number of solar panels for your home, what are the costs of having them installed and what will your monthly financial savings be? As an example, with BE Solar, if you install ten solar panels, the base cost would be \$21,000, the annual saving on your BELCO bill would be around \$2,651, and they could pay for themselves ...

Our straightforward, upfront pricing means you'll know exactly how much your new installation and service will cost before any work begins. Reports. Get real-time reporting in the palm of your hand with our energy portal. Maintenance. ...

Why don't more homes have solar? Despite the environmental impact and return on investment there are still a few factors slowing the rate of adoption. Two of these inhibitors include Bermuda's relatively high borrowing costs, although both Butterfield and HSBC Bermuda offer lower loan rates for solar, and inconsistent policies and regulations.
