

In 2022, a contract was signed to deliver battery electric multiple unit (BEMU) prototype and battery multiple unit prototype (BMU) with 6 energy storage devices. This aligns with the "The application of green technologies in railway passenger transport" initiative under the National Recovery and Resilience Plan 2021-2026.

The Slovenia-headquartered company was recently in the news for a 20MWh project it commissioned in Austria, which is the country's largest, and it is deploying the largest battery storage systems in neighbouring ...

Central and Eastern Europe (CEE)-based developer and independent power producer (IPP) Woodburn Capital is deploying a co-located battery storage project in Croatia, with final regulations around connecting batteries to the grid expected imminently.

The Government of Croatia is preparing EUR 500 million for the installation of batteries for storing renewable energy. Minister of Economy and Sustainable Development Damir Habijan said Croatia is ready for changes in the energy sector.

Croatia will provide some EUR500 million (US\$534 million) in subsidies for battery energy storage system (BESS) technology, a government minister has said. Minister of Economy and Sustainable Development Damir ...

Croatia will provide some EUR500 million (US\$534 million) in subsidies for battery energy storage system (BESS) technology, a government minister has said. Minister of Economy and Sustainable Development Damir Habijan revealed the funding, part of a larger EUR1.6 billion for energy projects, at the JANAF conference in Zagreb earlier this month ...

The battery storage system provides energy balancing and maintains grid stability on the island of Vis. The system operates on Li-ion batteries which enable rapid response, both in the terms of energy delivery requirements and for the purpose of storing electricity generated from either Vis SPP or the power grid.

THE BENEFITS OF Battery Energy Storage Solutions (BESS) BESS technology helps improve energy flow at every stage of the energy transmission chain. It can: reduce generation costs; simplify managing and flattening the load profile; increase grid stability and security (avoiding or postponing grid updates)

The global demand for renewable energy has led to the rise of battery energy storage system companies, also called BESS companies, which are pivotal for efficient and reliable energy storage. In this blog, we will list the top 10 leading companies in the BESS industry based on their technical prowess and market presence.

The Slovenia-headquartered company was recently in the news for a 20MWh project it commissioned in Austria, which is the country's largest, and it is deploying the largest battery storage systems in neighbouring Slovenia and Croatia, totalling 70MW/140MWh and 50MW/100MWh respectively.

The paper identifies multiple case opportunities for different power system stakeholders in Croatia, models potential BESS applications using real-world case studies, analyzes feasibility of...

In 2022, a contract was signed to deliver battery electric multiple unit (BEMU) prototype and battery multiple unit prototype (BMU) with 6 energy storage devices. This aligns with the "The ...
