Isle of Man Energy's recent 16% cut in tariffs will still mean its unit rate is 83% higher than it was in summer 2021. Manx Utilities says Tynwald's loan approval does not extend beyond March and anyway, using the £26m loan now to reduce tariffs would only lead to higher tariffs and costs overall in the longer term.

The loan will help pay for gas to fire the island's main power station in Pulrose. A six-month Isle of Man electricity price freeze will allow "more manageable" increases to be introduced next ...

NEL Power--Isle of Man Manx Electricity Authority, Pulrose Power Station Project Description The Pulrose Power Station was constructed to provide the Isle of Man with its own source of economical power allowing the Island to be less dependent on diesel engines and cable power supplied from England. In addition to efficiency,

Power Stations are situated at Pulrose, Peel, Ramsey and Sulby. Pulrose, including the CCGT, has a capacity of nearly 135MW. Peel has a capacity of nearly 40MW, a diesel generating station at Ramsey has a capacity of 3.6MW, and a small hydro station at Sulby has a capacity of 1.0MW.
