

Best solar panels for cold climates Armenia

Is Solara a green energy company in Armenia?

THIS IS NOW! Solar photovoltaic installation company SOLARA has adopted a strategy to carry out activities in the field of the green economy in Armenia and promote its development. Why Choose Solara? There is a great potential for solar energy in Armenia.

Why is solar energy important in Armenia?

There is a great potential for solar energy in Armenia. Its effective use is beneficial both economically and in other spheres of social life and everyday life. SOLARA company offers modern solar solutions, that provide exceptional efficiency, save a lot of money. Every project with us is successful.

Who makes solar panels in Armenia?

Solaron is the first manufacturer of solar panels in Armenia, which annual production capacity reaches about 60 megawatts. Brand "Solaron" is a registered trademark for products manufactured by Profpanel. In Solaron Company merged a team of highly qualified professionals with many years of experience in the business organization from scratch.

Where is Solaron available in Armenia?

Solaron's services are available throughout all regions of Armenia. Solaron is the first manufacturer of solar panels in Armenia, which annual production capacity reaches about 60 megawatts. Brand "Solaron" is a registered trademark for products manufactured by Profpanel.

Can solar panels be installed in a windy climate?

Furthermore, in rare cases, panels in windy climates have been subject to lifts that result in massive damage, especially when panels were installed with a vertical mount. In fact, the orientation of your panels and the mounting system matters a lot when you live in a colder climate. Here's why. Got tons of snow last winter?

How many projects has Solaron completed in Armenia?

Over the course of 8 years, Solaron has successfully launched and completed more than 1400 projects both in Armenia and abroad. Innovation is at the core of Solaron's approach, and we actively integrate innovative technologies and solutions into projects. Solaron's services are available throughout all regions of Armenia.

6 ???· Over time, research and development have refined these materials and mounting systems, making modern solar panels far more resilient than their early predecessors. Adapting and Innovating for Cold Climates. As the renewable energy landscape evolves, innovations targeting winter performance continue to emerge.

The GEF programme in Armenia is supported by the Climate Investment Funds (CIF) and the Green Climate

Best solar panels for cold climates Armenia

Fund (GCF). This should enable the company to produce PV panels with a total capacity of 5.4 MW. Statistics and similar investments financed by the GEF in Armenia suggest that the average relative energy savings achieved by installing PV ...

70 percent of Armenian solar panels marked "MADE IN ARMENIA" are exported to the USA and ensure the high efficiency of receiving solar electricity, and 30 percent reach Armenian consumers and absorb the Armenian sun.
