

Are black Americans underrepresented in solar industry?

Black Americans are widely underrepresented in the solar industry. The Solar Foundation and the Solar Energy Industries Association published a diversity report earlier this year that found that executive leadership in solar companies is almost exclusively white men.

Should Black communities invest in solar energy developers?

Join our mailing list! Investing in Black renewable energy developers will ensure the trillion-dollar transition to a low-carbon economy diversifies wealth creation and does not elude Black communities. Fairly accessing solar development is the sine qua non of wealth creation opportunities that emanate from that access.

Why is supporting black solar important?

Supporting Black solar supports developers and properly endows a value-chain in which Black and business owners participate. That includes workforce, financing and supply chain development. Barriers to entry in the solar field are exceptionally and unnecessarily high.

Should Black Solar be supported?

Fairly accessing solar development is the sine qua non of wealth creation opportunities that emanate from that access. Supporting Black solar supports developers and properly endows a value-chain in which Black and business owners participate. That includes workforce, financing and supply chain development.

What percentage of Solar executives are white?

The 2018 solar census found that 7.6% of 242,000 solar workers nationwide are African American. However, the executive leadership in solar companies is almost exclusively white men. (The passage does not provide the percentage of white executives directly, but the given information implies that they make up the majority.)

Who is SolGreen?

SolGreen is the first and only Black-owned and operated company that has invented, engineered and patented the first solar charging table or solar workstation, called the 'Evodia Solar Workstation'. SolGreen's vision is to introduce a technology that would modernize and maintain sustainable infrastructure in cities, parks and outdoor public spaces.
