We are passionate about delivering clean, affordable energy and supporting the UK and Europe's low carbon ambitions. Now, more than ever, we hope to help drive a green economy as demand for sustainable energy grows.

How can Bolivia improve energy production?

Bolivia continues to make efforts to upgrade the infrastructure needed for renewable energy production. The National Interconnected System (SIN), which the government has put in place, aims to improve the nation's capacity for producing electricity by building additional power plants, transmission lines and substations.

Who is Red Rock renewables?

Red Rock Renewables is a champion of innovation, supporting growth across the renewable energy industry and contributing to Europe's net zero ambitions. © Copyright 2024 Red Rock Renewables All Rights Reserved. Responsive website design, Development & Hosting by mtc.

How much power will Bolivia have by 2025?

More recently, Bolivia's national electricity company (ENDE) projected that by 2025, 74% of the installed capacity will be from hydropower, 4% from non-hydro renewables energy, 12% from combined cycle plants, and 10% from thermal power plants (ENDE, 2016). These projections, though, only take into consideration the SIN.

What type of energy system does Bolivia use?

Similar to the country's total energy system, the power sector relies heavily on natural gas (AETN, 2016). The electricity network in Bolivia is broken into two classifications: the National Interconnected System (SIN) and the Isolated Systems (SAs).

Can Bolivia have a low-carbon power system?

A sketch of Bolivia's potential low-carbon power system configurations. The case of Applying carbon taxation and lowering financing costs Energy Strateg. Rev., 17 (2017), pp. 27 - 36, 10.1016/j.esr.2017.06.002 J. Clean. Prod., 199 (2018), pp. 687 - 704, 10.1016/j.jclepro.2018.07.159 Technol. Forecast. Soc.
