

Will IPPs build solar power plants in Ivory Coast?

The selected IPPs will build solar power plants capable of delivering 60 MWp to the national grid in Ivory Coast. The solar plants are being built under the "Scaling Solar" program, an IFC initiative to leverage public-private partnerships (PPPs) for the rapid construction of solar power plants in developing countries, particularly in Africa.

Which companies are developing solar power plants in Ivory Coast?

The Egyptian company Elsewedy Electric is also among the potential developers of the Laboa and Touba solar plants. The same goes for Infinity Power Holding and Nareva Holding, the subsidiary of the Moroccan group Al Mada. The selected IPPs will build solar power plants capable of delivering 60 MWp to the national grid in Ivory Coast.

Why is Ivory Coast launching a solar power plant?

Ivory Coast's first solar power plant represents a significant step towards a greener and more resilient energy future. By reconciling economic development and environmental protection, the country is showing the way to a successful energy transition.

Where is a solar power plant located in Côte d'Ivoire?

Located in the north of Côte d'Ivoire, the Boundiali solar power plant enjoys a warm and dry climate, ideal for solar energy. Franck Alain Yayo, plant operations engineer, points out that the irradiance in this region is very high, which optimizes electricity production.

Is Borrego a reliable solar company?

Over the last 40 years, Borrego has established itself as one of the nation's most reliable solar and energy storage companies, known for its focus on safety, integrity, quality, and deep staff expertise.

What makes Borrego unique?

Driven by a mission to help solve the world's energy problems, Borrego has spent the last 40+ years engineering, optimizing, installing, and maintaining large-scale solar & storage projects. Our time-tested processes, long-term relationships, and corporate culture are all built around our core principles of trust and transparency.

The selected IPPs will build solar photovoltaic power plants capable of delivering 60 MW to the Ivory Coast's national grid. These projects are in line with Ivory Coast's target to ...

The government of Côte d'Ivoire collaborates with PFO AFRICA in a historic initiative, signing agreements for a 52 MWp photovoltaic solar power plant. Representing the ...

In the vast landscape of West Africa, silver sparkles in the sun: sustainable electricity is produced here with almost 70,000 solar modules. In Boundiali in the north of Côte d'Ivoire, the country's first solar power plant has now been ...

The government of Côte d'Ivoire collaborates with PFO AFRICA in a historic initiative, signing agreements for a 52 MWp photovoltaic solar power plant. Representing the largest independent power producer (IPP) project in ...

The Ivory Coast is set to begin construction of the \$63.5 million Ferke Solar power plant in Sokoro, which will have an installed capacity of 52 MW. Announced by government spokesperson Amadou Coulibaly in April, the project will commence in the second quarter of 2024 and is expected to be operational by the third quarter of 2025.

The Sokhoro Solar Power Station is a planned 52 MW (70,000 hp) solar power plant in Ivory Coast. The solar farm is under development by PFO Africa, an Ivorian subsidiary of the French conglomerate, PFO Energies. When completed, it will be the largest grid-connected solar power station in the country.

The selected IPPs will build solar photovoltaic power plants capable of delivering 60 MW to the Ivory Coast's national grid. These projects are in line with Ivory Coast's target to generate 42% of its electricity from renewable energy by 2030.

Ivory Coast is progressing in solar power plant development, with ten multinational companies qualifying for partnership. The plants, to be located in the Bafing region, are part of a public-private partnership. They are under the World Bank's Scaling Solar program.

In the vast landscape of West Africa, silver sparkles in the sun: sustainable electricity is produced here with almost 70,000 solar modules. In Boundiali in the north of Côte d'Ivoire, the country's first solar power plant has now been inaugurated by Ivorian Prime Minister Alassane Ouattara, Ivorian Minister of Mines, Petroleum, and Energy, Mamadou Sangafou Coulibaly, and German Parliamentary State Secretary Bodo Kofler.

The Ivorian Minister of Mines, Petroleum, and Energy, Mamadou Sangafou Coulibaly, announced the construction of 12 new photovoltaic solar power plants across the country between 2025 and 2026. This announcement ...

Ivory Coast has taken a crucial step in its energy transition with the opening of its first photovoltaic solar power plant in Boundiali. This project, emblematic of the future of renewable energies in the country, aims to reduce dependence on fossil fuels and promote a more sustainable energy mix.
