Bright energy storage technologies Tuvalu

Bright Energy Storage Technologies is developing an ultra-low-cost underwater energy storage system. Energy from the electric grid, or from an offshore renewable energy source, compresses air, stores it in vessels at the bottom of a body of water, and then generates electricity when released back to the grid.

Scott Frazier is CEO of Bright Energy Storage Technologies, a developer of innovative low-cost bulk energy storage and other carbon emission mitigation technologies. Frazier is an aerospace engineer and holds more than 10 US cleantech patents including concrete compressed air & thermal energy storage systems and natural gas hybrid rail
