

How energy efficient is Brunei Darussalam?

Brunei Darussalam's Energy Efficiency Progress The average annual electricity consumption per capita in Brunei Darussalam is about 9,000 kWh in 2020, coming second after Singapore, the highest in the Southeast Asia region, as shown in Table 1.

Should Brunei Darussalam provide incentives for building owners to retrofit?

The government of Brunei Darussalam should provide incentives to building owners to retrofit their homes either through cost-effective active or passive energy design strategies. The architects have to comply with the energy efficiency standards and practices.

How can the government of Brunei Darussalam solve these challenges?

With all of these challenges laid out, the government of Brunei Darussalam can solve them by allocating their funds to building a large community-scale grid-connected green public housing in an optimal location for occupants to travel to their jobs or any activity without geographical burden, as illustrated in Figure 2.

Why should you join EnTech?

Entech is always looking for talent to join our innovative team. Many stimulating jobs and a positive working environment. Discover what we have to offer. 2023, an energetic Year!

C'est une véritable montée en puissance qui a débuté amorcée fin 2018 par Entech smart energies. La start-up quimperaise, créée en février 2016, compte désormais 35 salariés et réalisait un ...
