Is the BVI reliant on fossil fuels?

Like many island nations, the BVI is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity. Electricity Sector Data The British Virgin Islands Electricity Corporation (BVIEC) was formed by ordinance in 1978.

How does Peter Island generate electricity?

The outer islands already use renewable resources to produce energy. Peter Island generates 70% of its electricity from two Wind Energy Solutions hybrid turbinesrated at 250 kilowatts (kW) each,backed-up by diesel generators. Cooper Island generates more than 75% of its electric needs from solar PV and uses solar water heating.
