

BTRY.ENERGY is a leading manufacturer of reliable battery pack assemblies for a variety of applications, ranging from powering unmanned aerial vehicles (UAVs) and robotic systems to electronic warfare and communications and laser guidance devices. By 2024, the company plans to expand its operations, launching more than 20,000 assemblies per ...

At BTRY, we aim to redefine the world of energy storage by developing an energy-dense solid-state battery that can be charged in one minute. Our innovation takes shape in thin-film solid-state batteries, a proven, long-standing technology.

BTRY AG: At BTRY, we aim to redefine the world of energy storage by developing an energy-dense solid-state battery that can be charged in one minute. Our innovation takes shape in thin-film solid-state batteries, a proven, long-standing technology.

Developer of a solid-state lithium battery intended to provide charging of the device at a faster speed. The company offers a sustainable, reliable energy storage alternative that provides ...

Developer of a solid-state lithium battery intended to provide charging of the device at a faster speed. The company offers a sustainable, reliable energy storage alternative that provides custom battery properties tailored to meet customers' diverse needs, enabling businesses and customers to reduce energy consumption by eliminating the need ...

BYD Energy Storage, established in 2008, stands as a global trailblazer, leader, and expert in battery energy storage systems, specializing in research & development, the company has successfully delivered safe and reliable energy storage solutions for hundreds of utility-scale, C&I, and residential projects worldwide. ...

The ETH Zürich and Empa spin-off BTRY has developed an energy-dense solid-state battery that can be charged in one minute. The cleantech startup received the CHF 150,000 investment from Venture Kick to set new standards in energy storage.
