Is solar power transforming remote communities in Cambodia?

Solar power is transforming remote communities in Cambodia with affordable, renewable energy and the chance to live more productive lives. However, hundreds of other villages remain off the grid, and energy experts say Cambodia should be doing more to harness the country's immense amount of untapped sunlight.

How many solar PV projects are there in Cambodia?

Scores of seven solar photovoltaic (PV) projects are in the pipeline for construction and planned for operation by 2023. The Cambodian government aims to generate 20 percent of energy from renewable energy. This is our guide to Solar Energy in Cambodia.

How many Cambodian households use solar energy?

Approximately one third of a million households, or 8.4% of overall Cambodian households, are currently using off-grid or micro-grid solar (Cambodia Socio-Economic Survey). In 2016, there wasn't a single solar plant in the country.

Where are solar power plants located in Cambodia?

Currently, solar power plants providing a total of 160 mW are located in Bavet city, Svay Rieng province, Kampong Speu province, and Kampong Chhnang province. Cambodia's existing solar power stations are already generating energy and linked to the grids.

How many solar power plants will Cambodia have by 2023?

According to the Ministry of Mines and Energy, Cambodia aims to have seven solar power plants in operation by the end of 2023, adding an additional 495 MW to the energy supply, which represents 20 percent of the total energy supply. In late October, Minister of Mines and Energy Suy Sem pledged to end new approvals for coal-fired power plants.

During the global pandemic, Cambodia's direct neighbors Thailand and Vietnam have made significant progress in the deployment of new solar technologies, utilizing floating and rooftop solar to complement existing power supplies.
