

Does Scatec have a solar power plant in Cameroon?

10 June 2024, Cameroon/Norway: Release by Scatec has entered into two new lease agreements with the national electricity company ENEO in Cameroon, expanding its existing solar and battery storage power plants in the country to 64.4 MW of solar and 38.2 MWh of batteries.

What is Vattenfall doing in the Netherlands?

With the Haringvliet hybrid energy park in the Netherlands, Vattenfall is combining the three technologies of battery, wind and solar for the first time. Vattenfall is constructing a unique battery storage facility in Uppsala, Sweden. A 22 MW battery is operational at one of Europe's largest onshore wind farms, Pen y Cymoedd.

How much energy will release supply in Cameroon?

When the extensions of the projects are completed, Release's projects in totality will supply energy to about 200,000 households in Cameroon, according to ENEO estimates, generating an annual production of about 141.5 GWh of electricity.

Why is Eneo reaffirming its partnership with Cameroon?

By increasing the installed capacity in the country, we are reaffirming our collaboration with ENEO and our commitment to Cameroon as a key market for our solutions," says Hans Olav Kvalvaag, CEO at Release.

Release by Scatec has entered into two new lease agreements with Cameroon's national electricity company, ENEO, to expand its existing solar and battery storage power plants in the country.

While Norway once aimed to be the "battery of Europe" it has since been overtaken by other Nordic countries Sweden and Finland for BESS deployments. Research firm LCP Delta's Jon Ferris explores the region's ...

Vattenfall operates large battery storage systems in combination with wind and solar parks at several locations in Europe. These combined systems, also known as hybrid parks, balance the feed-in for greater stability of the power grid. Vattenfall's newly built Haringvliet Energy Park in the Netherlands is the largest hybrid park in Europe.

Many of the world's largest energy companies - TotalEnergies, RWE and Vattenfall, to name a few - are quickly getting on board as well. Vattenfall has recently invested significant effort into BESS development, including the creation of several BESS projects in the UK, the most recent of which was brought online in October 2023.

Successful optimisation of batteries co-located with wind is complex but could help "unlock a blueprint" for managing assets at portfolio level, the chief executive of UK software company Arenko has said.

Release completed the already existing solar plants in Maroua and Guider in Cameroon (35.8 MW solar and 19 MWh BESS) in September 2023, and is now adding 28.6 MW of solar and 19.2 MWh of battery storage.

This paper aims to develop a methodology to determine SoH of operational Vattenfall BESS projects without performing offline capacity and resistance tests. Generally speaking, the methodology can be extended to other batteries used for ...
