

Advanced Modular Power Systems (AMPS) is excited to announce that our patented technology has successfully passed all factory acceptance testing and has completed rigorous field trials with 100% availability and reliability.

Typically, generators used to supply loads are oversized by 60-70% in order to overcome:

- o Power start-up requirements of the load
- o System harmonics
- o Non-linear loads
- o Poor power factor ...

Our legacy stems from Arkel's global experience, operating hundreds of gen-sets for BP, Exxon Mobil and others. This experience gave us the insight and capability to design an alternative innovative power source for industry.

Modular UPS offering a wide range of modular and redundant backup power systems with 20% more power for the same footprint at the same price point. The built-in flywheel energy storage takes up less than half the footprint of battery based systems, delivers efficiency up to 98% and lowers total cost of ownership by up to 40% over the life of ...

Advanced Modular Power Systems (AMPS) is excited to announce that our patented technology has successfully passed all factory acceptance testing and has completed rigorous field trials ...

Modular Power Systems is a leading Canadian company in the supply of parts, partial assemblies and technology for construction of low voltage electrical equipment for domestic and export markets. We supply low voltage electrical solutions for infrastructure projects in industries such as mining, marine, oil and gas exploration, power generation ...

This presentation provides an overview of the Advanced Modular Power Systems (AMPS) Project, along with sections to describe the three technical focus areas - Modular Power Electronics & Standards, Autonomous Power Control, and the Modular Power Testbed.

The Advanced Modular Power Systems (AMPS) project is infusing new technology into power systems and components and proving their capabilities through exploration-based ground demonstrations. The AMPS technology portfolio includes the development of modular electronic units which, when combined with standardized interfaces, will provide ...

Alpha's Modular Power System HP2 offer Telecom-grade AC power for critical loads in Central Offices, Switching Centers, Cable Head-Ends and Data Centers. These systems offer exceptional reliability, up to 94% power efficiency and optimal power density through a scalable, modular platform with integrated, intelligent

system control.

Modular UPS offering a wide range of modular and redundant backup power systems with 20% more power for the same footprint at the same price point. The built-in flywheel energy storage takes up less than half the footprint of battery ...
