

What can you do with a shipping container?

Birch plywood for walls Cedar Tongue and groove boards for ceiling add to a refreshing and nice smell inside the container Shipping containers make off grid shelters & bunkers above or below ground with solar power systems & and portable power stations. Freeze dried food.

How will Ontario's new power plant work?

The facility will take surplus electricity from the Ontario grid during off-peak hours and return it during times of higher demand. The developers have a 20-year contract in place with the government-owned Independent Electricity System Operator in Toronto for most of its capacity, according to Northland.

Are shipping containers commoditized?

Shipping containers are commoditized,so they are easy to find. In most parts of the world,you can get one in just a few days. Easily found and customized to meet you and your families needs. Containers are so airtight that they have more condensation issues than most traditionally constructed buildings (though this is easily dealt with).

Why are containers so strong?

Containers are made to endure treacherous voyages across the planet while filled with all kinds of products and hundreds of thousands of pounds of filled containers stacked on top. Even unmodified,they are still much stronger than most types of traditional construction. They are designed to be tough.

The Tesla Megapacks are going to be used to store surplus power from renewable energy produced in Ontario and deliver it back to the grid at peak demand. It will also provide grid balancing...
