

ABSOPULSE"s rugged power supplies are designed and built for an operating life of up to 30 years in demanding environments. Our power converters perform reliably in a diverse range of applications in installations around the world. These include automotive, industrial automation, power utilities, mining, shipboard, telecom and many others.

We have manufactured and delivered over 100 units of power transformers to the global markets across Asia Pacific, Africa, Latin America and Canada, with complete range up to 190 MVA, primary voltage up to 275kV and Shunt Reactor Transformer.

Rugged, Most Versatile and Multi-Channel monitoring solution, Capable of Monitoring One or Multiple Assets: Basic Asset Monitoring, Fiber Optic Temperature Monitoring, Partial Discharge, Bushing, OLTC, Load, Power, and ...

Rugged, Most Versatile and Multi-Channel monitoring solution, Capable of Monitoring One or Multiple Assets: Basic Asset Monitoring, Fiber Optic Temperature Monitoring, Partial Discharge, Bushing, OLTC, Load, Power, and more. KEY FEATURES. Improved asset reliability; Accurate predictive analysis; Access asset data from anywhere
