

## Cayman Islands empresas de energias renovables

What are the benefits of solar power in the Cayman Islands?

Supplies sufficient power to Caribbean Utilities Company, Ltd. to serve 1,800 homes in the Cayman Islands. Reduces greenhouse gas emissions by 7,900 tons of CO<sub>2</sub> per year. Serves as the country's only utility-scale solar project, providing renewable energy to the grid's peak load of 110 MW.

How can the Cayman Islands build climate resilience?

With a target of 70 percent renewable energy by 2037, the Cayman Islands is seeking to build climate resilience by purchasing clean energy for its electricity supply. The country established its first utility-scale solar project in 2017 through a power purchase agreement with renewable energy generated from the Bodden Town Solar Farm.

Why did BMR invest in the Cayman Islands?

BMR seized the opportunity to establish operations in the Cayman Islands, expanding the footprint of its business and positioning itself for further growth in this important market. As the only existing utility-scale project, there is potential to expand the project to generate more renewable energy for the island.

Why did Bodden Town solar move to the Cayman Islands?

The original developers of the Bodden Town Solar facility sought to exit the Caribbean market once the plant entered service. BMR seized the opportunity to establish operations in the Cayman Islands, expanding the footprint of its business and positioning itself for further growth in this important market.

El establecimiento de Certificados de Energías Limpias (CELs) y la promoción a fuentes de generación "verdes" hizo que las algunas de las nuevas empresas de suministro eléctrico y usuarios calificados viren hacia las energías renovables como uno de las principales tecnologías para implementar.

"No solo cuenta con fuentes de energía renovables capaces de abastecer a esta nación, sino que es capaz de exportar sus excedentes a América del Sur, sobre todo a Argentina", indica. En América Latina, más de la cuarta parte de la energía primaria procede de fuentes renovables, el doble de la media mundial.

En 2023, el mercado latinoamericano de energías renovables alcanzó un valor aproximado de USD 91,36 mil millones. Se calcula que el mercado crecerá a una tasa anual compuesta del 6,50% entre 2024 y 2032, para alcanzar un valor de ...
