Haf Power Solutions (HPS) has selected Corvus Energy to supply energy storage systems (ESS) for the energy subsea construction vessel (ESCV) to be built for shipowner Rem Offshore. The Corvus Energy-supplied ESS is scheduled for delivery during the first half of 2026 and the vessel will go in into operation in the second half of the same year.

In most parts of the Cayman Islands, power is provided by a utilities company called Caribbean Utilities Company (CUC), which uses diesel generators to fuel the power grid in densely populated and developed areas on the islands, particularly in Grand Cayman. Overall, the grid is highly reliable, and CUC customers can easily report outages and ...

cBull Energy Storage System will make sure generators are optimized to run at optimum load. This allows for fewer engines connected to the switchboard as peaks in power demand are absorbed by the batteries and will result in 15-20% reduction in fuel consumption, maintenance costs, CO2 emissions and increases redundancy

With the rapid population growth in recent years, the demand for power has surged, but the national energy plan calls for a transition to 70% renewables by 2037, and only 3% of the Cayman Islands' power currently ...
