

What are the benefits of solar power in the Cayman Islands?

Supplies sufficient power to Caribbean Utilities Company, Ltd. to serve 1,800 homes in the Cayman Islands. Reduces greenhouse gas emissions by 7,900 tons of CO₂ per year. Serves as the country's only utility-scale solar project, providing renewable energy to the grid's peak load of 110 MW.

What is Grand Cayman's first commercial solar project?

Grand Cayman's first commercial solar project, a 5 MW Solar Farm, was completed and commissioned in 2017. It is connected to the Company's Bodden Town Substation and provides energy to power approximately 800 homes with clean renewable solar energy.

Is Cayman the perfect place to harness solar energy?

Significant improvements are being made in the solar energy industry every year and Cayman is the perfect location to harness the power of the sun. Solar energy can be harvested in two ways: solar photovoltaic (PV), which converts sunlight into electricity and solar thermal, which heats water.

How does CUC power a solar power plant in Grand Cayman?

The fuel is transferred by pipeline from suppliers' tanker terminals to CUC's centralised generating Power Plant located on the outskirts of George Town. In 2017, CUC commissioned Grand Cayman's first commercial solar project.

How can the Cayman Islands build climate resilience?

With a target of 70 percent renewable energy by 2037, the Cayman Islands is seeking to build climate resilience by purchasing clean energy for its electricity supply. The country established its first utility-scale solar project in 2017 through a power purchase agreement with renewable energy generated from the Bodden Town Solar Farm.

Are solar panels duty-free in Cayman?

However, renewable energy equipment, such as solar panels, are in fact duty-free for residential homeowners. Although Cayman enjoys over 300 days of sunshine, you will need to consider an alternative source of power should there be no sun. One such option is the Tesla Powerwall battery.

Solar power is a trusted option for renewable energy and in the long run can reduce your electricity bill. Solar panels can be installed on residential and commercial properties. The companies below are professional solar panel installers who design and install solar systems to meet the Cayman building code.

Founded in 2008 GreenTech Solar is the oldest renewable energy company in the Cayman Islands and one of the first renewable energy providers in the Caribbean. A multi-award winning renewable energy design-build firm we are ...

Adding solar power to your commercial or residential property is becoming the environmentally right thing to do. It sends a positive message to clients, colleagues, friends and family members. A solar powered pool pump will reduce your yearly electric bill by as much as 20 %.

Affordable Solar Cayman Ltd. offers solar power consulting and systems installations in Cayman Islands. We provide services to commercial and residential projects, including CORE program and off-grid solar systems, and solar heating solutions ...

Affordable Solar Cayman Ltd. offers solar power consulting and systems installations in Cayman Islands. We provide services to commercial and residential projects, including CORE program ...

The Farm comprises 21,690 poly-crystalline photovoltaic (solar) modules each with a DC-rated capacity of 305 watts. The facility is connected to CUC's Bodden Town Substation and provides energy to power approximately 800 homes with clean renewable solar energy.

Supplies sufficient power to Caribbean Utilities Company, Ltd. to serve 1,800 homes in the Cayman Islands. Reduces greenhouse gas emissions by 7,900 tons of CO₂ per year. Serves as the country's only utility-scale solar project, providing renewable energy to the grid's peak load of ...

Power your home and business with low-profile, durable solar panels from Heliene and Hyundai. Enjoy decades of clean energy generation with minimalist aesthetics. Upgrade your electrical infrastructure with the Micro-Air Easystart system .

Switching over to solar can significantly reduce your carbon footprint and help combat climate change, not only for yourself but for the entire Cayman Islands too. Our beloved islands' footprint is unfortunately still over 97% fossil, so act and accelerate our way to eco-friendliness.

Cayman's goal of obtaining 70% of its power from renewable resources by 2037 has raised discussion for alternative ways of doing this. While solar power remains a trusted option for renewable energy, with rising fuel prices and increasing air conditioning costs, interest in geothermal energy cooling systems is also on the rise.

Power your home and business with low-profile, durable solar panels from Heliene and Hyundai. Enjoy decades of clean energy generation with minimalist aesthetics. Upgrade your electrical infrastructure with the Micro-Air Easystart ...

Founded in 2008 GreenTech Solar is the oldest renewable energy company in the Cayman Islands and one of the first renewable energy providers in the Caribbean. A multi-award winning renewable energy design-build firm we are focused on providing the most innovative clean energy solutions in the Caribbean region.
