

Will AMEA power build a solar photovoltaic plant in Djibouti?

Emirati independent power producer (IPP) AMEA Power has signed agreements to build a solar photovoltaic plant in Djibouti. With a capacity of 30 MWp, the construction of the solar plant will be done in the framework of a public-private partnership (PPP).

Will Djibouti be the first country to produce 100% green energy?

In its bid to become the first country on the continent to produce 100% green energy by 2035, Djibouti can also draw on other ambitious projects. These include the solar power project in the Grand Bara desert, for which work began in 2020.

Will Djibouti be self-sufficient in energy production in 2035?

In December 2023, the Republic of Djibouti signed up to the African Green Hydrogen Alliance. The country's formidable prospects in terms of renewable energy means that Slim Feriani can look to the future with confidence. "The objective for 2035 is to be self-sufficient in energy production," he says. "We should get there before then."

Does Djibouti have a monopoly on electricity?

It should be noted that the state-owned company *Electricite de Djibouti* retains a monopoly on the transmission and distribution of electricity. The project was developed by Red Sea Power (RSP). "This site has the best wind energy potential in Africa, alongside Tangiers in Morocco," says Francois Maze, its CEO.

Why did Djibouti open up electricity production to independent operators?

For the government, the aim was to open up electricity production to independent operators so as to achieve energy independence as soon as possible. It should be noted that the state-owned company *Electricite de Djibouti* retains a monopoly on the transmission and distribution of electricity. The project was developed by Red Sea Power (RSP).

What is AMEA power's 25-year PPA for Djibouti?

Dubai-based AMEA Power has secured a 25-year PPA from Djibouti's state-owned utility, *Electricite de Djibouti* (EDD), for a 25 MW solar-plus-storage plant it plans to build in Grand Bara, south of the national capital. The solar plant is the country's first IPP project and will be developed under a BOOT model.

The power generated from the project will be sold to Electricite de Djibouti under a power purchase agreement for a period of 25 years. For more details on Grand Bara Solar PV Project, buy the profile [here](#). About AMEA Power AMEA Power LLC (AMEA), a subsidiary of Al Nowais Investments LLC, is a power producer of renewable and thermal ...
