

Por intermedio de la eficiencia energética, en Enel X hemos desarrollado diversos proyectos que generan energía limpia, sostenible y eficiente, tratando de transformar a Santiago en una smart city. ¿Cuáles son estos proyectos y por qué son energéticamente eficientes?

This booklet brings together the results of a two years research and collaboration project in the fields of sustainable and resilient architecture with an emphasis on the "Zero-Energy Buildings...

To improve energy performance of public buildings, 100 public buildings will be updated with "ESCO model contracts" Solar thermal systems and photovoltaic systems on households and investments on Solar rooftop on public buildings Smart measurement will be applied for at least 1000 public buildings Energy updating programs Experience on ...

Chilectra has structured an energy efficiency plan based on three themes - diffusion, customers and education. Diffusion contemplates a strategy to customers that implies that they will make the best decisions from an energy efficient point of view.

In this paper, we put forth alternative decarbonization scenarios for Chile's energy transition based on the Smart Energy Systems concept, which focuses on the integration of the whole energy system by including all sectors - with their synergies and related infrastructures -to find suitable energy efficient and cost-effective solutions to ...

That's why it's becoming an ideal ecosystem for both Chilean and foreign entrepreneurs who want to work on the latest technological trends. Enel, which is the largest energy company in Chile, is firmly committed to this through its Enel Santiago Innovation Hub, where exciting new solutions are emerging.

The power of change: Smart meters in Chile's energy transition . Bnamericas Published: Monday, ... Address Chile: Alonso de Córdova 5870, Office 413, Las Condes, Santiago, Chile.

Enel Green Power Chile, the renewables division of Chilean utility company Enel Chile, has started assembling an 80-MW solar farm with a collocated battery energy storage system (BESS) of 67 MW near the nation's ...
