The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate. The peak time-of-use (TOU) rates can be double the price compared to off-peak rates. In such a scenario, a solar battery storage system can come in handy for using electricity without having to pay such a high price.

Solar power battery systems are an important component of any home solar system. Having a good quality and reliable battery means you can get the most out of your solar system and can save even more money and energy.
